Dear Mr. Papaiadasan,

Thank you for your calling and kind patience.

On our investigation, it is found that your company complies with the IHM developing procedure.

Please kindly go ahead and let us know the ships for which you would like to develop the IHM

Best Regards,

T.Yamamoto IHM Manager (+81-80-2342-1600)

Dear Sir,

As for an IHM approval, please kindly find the attached in which the approval process is described step by step.

We generally ask the experts who have never worked with us to submit some copies of the IHMs and VSCPs ever developed by your side before a shipowner applies for the certification in order for us to know the expert's knowledge and experience

Accordingly, please kindly submit the following for our review from the expert.

a. Company's manual to develop the Part I of Inventory of Hazardous Materials complying with IMO Guidelines, MEPC 269(68) "2015 Guidelines for the development of the Inventory of hazardous Materials", including the specific procedure for the following items:

- 1 Procedure for collecting necessary information
- 2 Procedure for the assessment of collected information
- 3 Procedure for the development of Visual/sampling check plan including how to document check, how to choose the sampling points
- 4 Procedure for the onboard visual sampling check including how to record the check, take samples and keep the specimens properly for analysis at the laboratory
- 5 Procedure for the development of IHM Part I after the onboard visual sampling check and analysis

6 Procedure for keeping the records for the process to develop each IHM

b. Company quality management systems

c. Training system of the experts and list of the trained experts with their experiences

d. Full copies of some of VSCPs and IHMs ever developed by the expert, and other information such as historical result for approval by the classification societies

Your kind understanding is appreciated.

Best Regards,
